

JOIN THE GRID

Goodware Repository Information Database

Collective intelligence is the key to fighting cybercrime. The efforts of the antivirus industry alone are not enough to stem the deluge of threats finding their way into our computers and devices.

Cybercrime has become organized. Profit from stolen data and disrupted operations feeds a booming underground economy driven by rings of cybercriminals located all over the globe. They are smarter and faster than ever before, intent on infiltrating the breadth of our Web experience.

We must band together. Everyone involved must take an active role for a challenge of this magnitude. We must share our collective expertise and knowledge to outsmart and overtake digital threats lying in wait for their next victims.

Join the GRID. The GRID is a huge collection of our good files. It aims to be a vanguard list that differentiates what are safe and good from those that pose a threat to our systems. Joining the GRID is a strong response to cybercrime. It is your sincere commitment to secure the safe exchange of digital information.

Why Join The GRID?

Safeguard the Internet

Be among the good guys. Be recognized as part of a team that fights cybercrime.

Your logo will stand together with other vanguards of Internet safety in Trend Micro's high traffic sites. You will also be part of a powerful and memorable PR campaign that will identify you as a proactive citizen committed to keeping the digital world safe.

Use Easy and Convenient Tools

Enjoy automated and highly customizable tools. Participate actively and contribute valuable information without any hassle or drastic changes in your own operations.

You need only to setup once and you will be good to go for a long time without having to check the system again and again. Only minimal effort is required on your part but the impact of your contribution will be felt by many.

Protect Your Trustworthiness

Lessen the chance of getting associated with badware. Part of the service Trend Micro provides will be the scanning of your files, ISPs, updates, and new versions you wish to release.

Through this service, you can proactively avoid false alarms with any Trend Micro product. You will also get alerted if your code sets off a false alarm.

Why Trend Micro?

- Trend Micro – a global leader in Internet content security – focuses on securing the exchange of digital information for businesses and consumers.
- We deliver security that's smarter than conventional approaches by blocking the latest threats before they reach you
- Trend Micro advances integrated threat management technology to protect operational continuity, personal information, and property from malware, spam, data leaks, and the newest web threats.
- We offer flexible solutions, available in multiple form factors and supported 24/7 by threat intelligence experts around the globe.

Trend Micro™ Smart Protection Network™

uses a global network of threat intelligence sensors to continually update email, web, and file reputation databases in the cloud, identifying and blocking threats in real time before they reach you. It's cloud security made smarter.
