Trend Micro™

DEEP DISCOVERY

Advanced Threat Protection Against Targeted Attacks

Trend Micro Deep Discovery is an advanced threat protection platform that enables you to detect, analyze, and respond to today’s stealthy, targeted attacks. Using specialized detection engines, custom sandboxing, and global threat intelligence from the Trend Micro™ Smart Protection Network™, Deep Discovery defends against attacks that are invisible to standard security products. Deployed individually or as an integrated solution, Deep Discovery solutions for network, email, endpoint, and integrated protection provide advanced threat protection where it matters most to your organization.

Key Benefits

Protection Against Attacks
Unique threat detection technologies discover attacks before the damage is done.

A Single Platform. A Range of Solutions
Deploy advanced threat protection where it matters most to your organization.

Intelligence for a Rapid Response
Deep Discovery and global threat intelligence drive a rapid and effective response.

The Trend Micro Custom Defense
Unite your entire security infrastructure into a real-time defense against targeted attacks. Deep Discovery detection and intelligence sharing is the foundation of the Custom Defense, enabling you to rapidly detect, analyze, and respond to your attackers.

THE DEEP DISCOVERY PLATFORM: KEY FEATURES

Advanced Threat Detection
Identifies attacks anywhere on your network using specialized detection engines, correlation rules, and custom sandboxing.

Custom Sandboxing
Uses virtual environments that precisely match your system configurations to detect the threats that target your organization.

Smart Protection Network Intelligence
Leverages real-time, cloud-based security intelligence for threat detection and in-depth attack investigation.

Custom Defense Integration
Shares IOC detection intelligence with other Trend Micro and third-party security products to stop further attacks.
NETWORK ATTACK DETECTION

Defend against attacks invisible to standard security solutions

TREND MICRO™ DEEP DISCOVERY INSPECTOR is a network appliance that monitors traffic across all ports and more than 80 protocols and applications. Using specialized detection engines and custom sandboxing, it identifies the malware, C&C, and activities signaling an attempted attack. Detection intelligence aids your rapid response and is automatically shared with your other security products to block further attack.

EMAIL ATTACK PROTECTION

Stop the spear-phishing attacks that lead to a data breach

TREND MICRO™ DEEP DISCOVERY EMAIL INSPECTOR is an email security appliance that uses advanced malware detection techniques and custom sandboxing to identify and block the spear-phishing emails that are the initial phase of most targeted attacks. It adds a transparent email inspection layer that discovers malicious content, attachments, and URL links that pass unnoticed through standard email security.

ENDPOINT ATTACK DETECTION

Investigate and respond to attacks with endpoint and server intelligence

TREND MICRO™ DEEP DISCOVERY ENDPOINT SENSOR is a context-aware endpoint security monitor that records and reports detailed system activities to allow threat analysts to rapidly assess the nature and extent of an attack. Indicators of compromise (IOC) intelligence from Deep Discovery and other sources can be used to search endpoints to verify infiltrations and discover the full context and timeline of an attack.

INTEGRATED ATTACK PROTECTION

Improve the threat protection of your existing security investments

TREND MICRO™ DEEP DISCOVERY ANALYZER is an open custom sandbox analysis server that enhances the malware detection capabilities of all your security products. The Analyzer supports out-of-the-box integration with many Trend Micro products, manual sample submission, and an open Web Services interface to allow any product or process to submit samples and obtain results.

CENTRALIZED MANAGEMENT AND INVESTIGATION

Assess, prioritize, and investigate attacks with Trend Micro or SIEM systems

TREND MICRO CONTROL MANAGER provides centralized views, threat investigation, and reporting across Inspector units, as well as central management functions for all Deep Discovery and Trend Micro products. Most Deep Discovery products also integrate with popular SIEM solutions, including HP ArcSight, IBM QRadar, and Splunk.
