Our Commitment to Protecting Our World

March, 2021

As a global leader in cybersecurity, Trend Micro is committed to making the world a better, safer place to live our lives, both digitally and physically. Sustainability is part of our corporate vision and core values, and we strive to integrate it in our daily operations by inspiring employees to help create a better future for all.

- We strive to innovate and enable our clients with solutions that help them create positive impacts on the world and the way we live.
- We are committed to minimizing our environmental footprint across our operations and supply chain with a focus on protecting our planet.
- We continually work to reduce waste across our operations while also raising employee awareness about initiatives for protecting our planet.
- By working with key partners like AWS and Microsoft who are also focused on environmental sustainability, we are working towards reducing our carbon emissions and energy consumption and doing our part to achieve a low-carbon future.
- We aim to meet or exceed all applicable environmental laws, regulations, and reporting requirements.
- We are working toward implementing additional policies and programs around environmental stewardship and will transparently track our achievements as we work to reduce our overall environmental impact.

For any questions and/or additional information about Trend Micro’s overall corporate social responsibility program, please contact your Trend Micro representative or check out our web site at https://www.trendmicro.com/en_us/about/corporate-social-responsibility.html.
