How can Trend Micro™ XDR solve your detection and response challenges?

It only takes one threat to get through to be 100% at risk.

Stealthy threats are evading detection

In the last five years, there’s been a 67% increase in security breaches (+11% YoY growth).

- Accenture

Siloed tools lead to missed detections and piecemeal, manually taxing investigations.

Disconnected security layers make analyzing and investigating threats a challenge.

66% of organizations said that threat detection/response effectiveness is limited because it is based upon multiple independent point tools.

- ESG

With no clear indicators, it’s hard to respond effectively.

Organizations have limited time or skills to manage these threats.

Too many alerts? Not sure what’s critical? Hard to investigate? Threats taking too long to detect?

68% of breaches took several months or longer to discover.

The mean time to identify (MTTI) increased to 197 days and mean time to contain (MTTC) increased to 69 days.

- Verizon

Correlation and analytics across security layers means fewer, higher fidelity alerts and faster, earlier detection – with it, you can combat threat overload.

A rtificial Intelligence and expert analytics

More than 55% of all security professionals receive over 10,000 security alerts on a daily basis.

- Imperva

XDR connects events across email, endpoint, server, cloud workloads, and network that seem benign on their own – but represent a meaningful indicator of compromise.

Beyond the endpoint

94% of malware infections come from email, which is the #1 cyberattack source.

- Verizon

Single console with one source of prioritized alerts, supported by visualization and guided investigation, to help you “connect the dots”.

Complete Visibility

More than half of enterprises use 25+ siloed security technologies. XDR leverages solutions that are designed to work together.

- ESG

Managed XDR offers 24/7 alert monitoring and investigation, remediation and response – backed by the resources and expertise of a team of Trend Micro security experts.

Augment your team with a Trend Micro™ Managed XDR Service
