TrendAI™

Solution Brief

TrendAI Vision One™ Services

Extend your team with trusted 24/7 cybersecurity experts to predict, prevent, and manage breaches and focus on strategic initiatives

Navigating evolving threats amid resource constraints

Ongoing technological advancements and evolving threats are reshaping business operations. To protect data, maintain trust, and ensure continuity, businesses turn to services for essential protection, compliance, and peace of mind, especially amid resource constraints. **According to Accenture's State of Cybersecurity Resilience report**, 72% of organizations experienced at least one significant security breach in the past year, making the need for comprehensive security solutions and services more critical than ever.

Predict, prevent, and manage breaches

Our services offer a wide range of enterprise cybersecurity solutions, including professional consulting and an industry-leading AI security platform. Gain proactive security outcomes through 24/7 managed detection and response, cyber risk advisory, incident response, red and purple teaming (including penetration testing) exercises, and timely access to global support expertise. Enable your security leaders to predict, prevent, and manage breaches while protecting your businesses more effectively and allowing your team to focus on strategic initiatives.

KEY BENEFITS

- Get proactive risk management that amplifies your security
- Gain increased confidence with significantly reduced chance of threats and incidents
- Leverage operational efficiency that minimizes resource constraints and provides around-the-clock peace of mind
- Utilize highly skilled security professionals available globally
- Gain business resilience with board-ready security insights to maximize ROI

TrendAI™ achieved 100% detection of major attack steps in the 2024 MITRE Engenuity ATT&CK Evaluations for Managed Services, outperforming simulations of DPRK, CL0P, and LockBit ransomware attacks.

TrendAI Vision One™ Services – Managed Detection and Response (MDR)

This service strengthens your organization's defense by detecting, investigating, and responding to advanced threats designed to circumvent traditional security controls through:

- **Multiple vectors**. Monitoring of various security solutions, including email, endpoints, servers, cloud workloads, networks, and third-party logs for enhanced visibility.
- **Detection**. Around-the-clock alert monitoring, correlation, and prioritization using automation and analytics to continuously sweep your environments for newly identified indicators of compromise (IoCs) or indicators of attack (IoAs).
- **Investigation**. Our experts generate root cause analysis to give you a complete picture of the attack across your entire enterprise, showing you the attack vector, dwell time, spread, and impact.
- **Response**. Deliver solution response options to contain your organization's threats and automatically generate IoCs to prevent future attacks. Get access to a step-by-step response plan and custom clean-up tools to help recover from threats.
- **Reports and reviews**. Get access to detailed reports on investigated threats, monthly executive summaries, and formal service performance reviews at least once a quarter.

TrendAI Vision One™ Services – Cyber Risk Advisory

Proactively assess, better understand, and mitigate cyber risks. Gain strategic guidance to improve security effectiveness and align security initiatives with business objectives.

Key features include:

- Up to five customized engagements every year
- Threat briefings specific to your industry vertical and geographic region
- Security gap analysis and prioritized recommendations
- Incident readiness planning
- Executive summary reports
- Workshops with operational teams

Premium support

Leverage dedicated technical assistance with 24/7 support for the TrendAI Vision One™ platform. Key features include:

- **Around-the-clock support**. Get technical assistance anytime, any day of the year.
- **Named account manager.** Receive personalized support, strategic guidance, and best practices directly from your dedicated technical account manager (TAM), who serves as your trusted advisor for all your needs.
- **Priority handling**. Gain faster response times for critical issues.
- **Proactive monitoring**. Leverage continuous monitoring and alerts for potential threats.
- **Health checks**. Receive regular optimization and performance checks.
- **Training**. Access resources and sessions for better solution utilization.
- **Custom reports**. View detailed, tailored analytics and insights.

Incident response (IR)

Quickly identify, contain, eliminate, and recover from critical security incidents with minimal financial and reputational impact. With a structured methodology in place, you're ahead of cybersecurity breaches and attacks. Our IR service will keep you compliant, efficient, and less prone to exposure.

Key features include:

- **Containment**. Minimize downtimes with fast and effective service.
- **Investigation and recovery**. Accelerate your decision-making with expert-led analysis.
- **Reporting and crisis coordination**. Access enhanced insights and support.
- **Deep incident response expertise**. Navigate challenges with help from a globally distributed team.
- **Post-incident guidance**. Benefit from strategic long-term resilience.

TrendAI Vision One™ Services – Complete

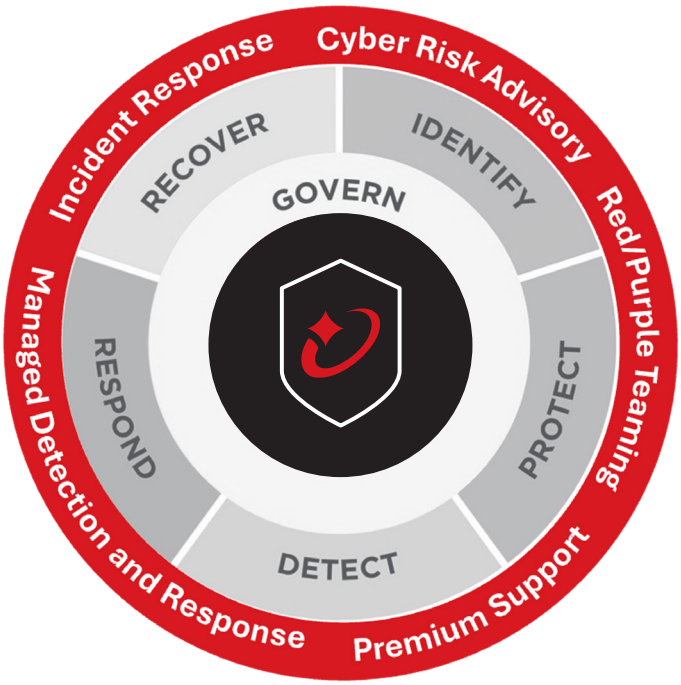
Our flagship offering encompasses a comprehensive range of your organization's cybersecurity lifecycle, featuring MDR, IR, and premium support components. Combine key pieces of the TrendAI Vision One™ Services portfolio into a single package to ensure you're covered on multiple fronts.

Red/purple teaming

Simulate advanced cyber attacks to identify security vulnerabilities across your organization, including AI and LLM implementations, before real threats can exploit them. By combining offensive red team tactics with defensive blue team responses, test security across all of your environments using the latest threat intelligence. Engage with these exercises to receive actionable remediation guidance while developing practical defensive skills, ultimately enhancing your organization's resilience against advanced threats.

Key features include:

- **Critical gaps identification**. Predict what real attackers can do.
- **Adversary simulations**. Obtain security controls and business process validations through realistic simulations.
- **Actionable, prioritized findings**. Gain real-world insights to strengthen defenses.
- **Detection and response testing**. Improve team readiness to tackle emerging threats effectively.
- **Reporting and recommendations**. Receive comprehensive insights tailored for you, delivered with extensive details.



Proactive, platform-driven security

Powered by TrendAI Vision One™, our services combine risk management, advanced threat detections, rapid investigations, and resolutions to give you comprehensive security across all your diverse environments and tools.

Expert-led, globally delivered

Our highly skilled cybersecurity professionals carry various certifications through industry-leading organizations such as SANS Institute and GIAC and are validated by achieving 100% detection of all major attack steps in the **MITRE Engenuity™ ATT&CK Evaluations for Managed Services**. With broad geographic coverage, we're equipped to support your team—wherever you are.

Adaptive and scalable

Whether you need proactive monitoring or incident response guidance, we have the expertise to meet your needs. With around-the-clock critical access and built-in flexibility, you get the right level of protection to operate and scale efficiently.

"[TrendAI Vision One™ Services] enables us to focus on high-value projects and leaves security to the experts to handle ... my team now has the freedom to focus on other priorities.
