TREND MICRO

How can Trend Micro™ Worry-Free™ XDR solve your detection and response challenges?

THE PROBLEM

Stealthy threats are evading detection

It only takes one threat to get through to be 100% at risk.

In the last five years, there's been a **67% increase in security breaches** (+11% YoY growth).

-Accenture

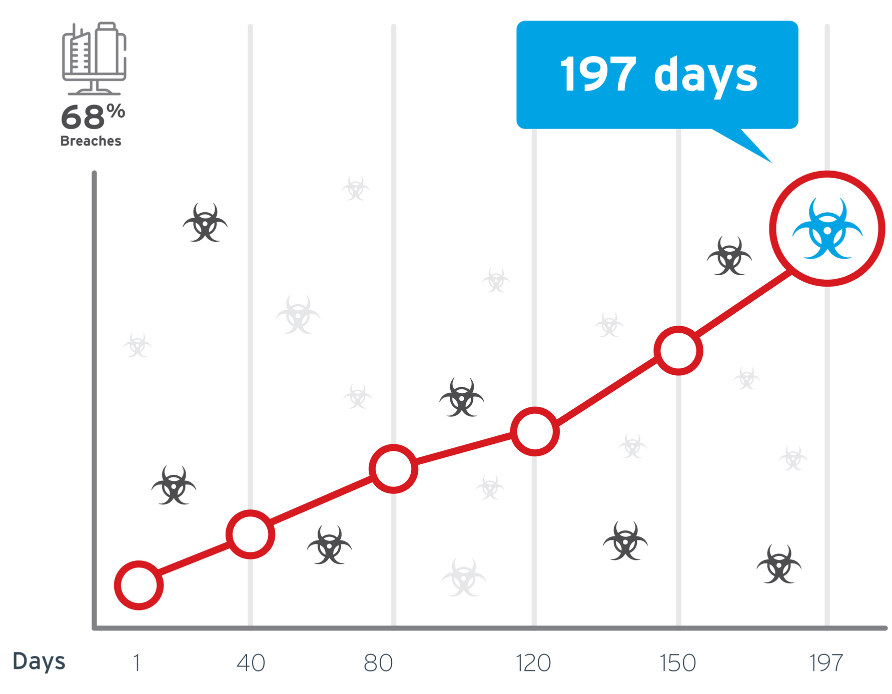
Disconnected security layers make analyzing and investigating threats a challenge.

Siloed tools lead to missed detections and piecemeal, manually taxing investigations.

66% of organizations said that threat detection/response effectiveness is limited because it is based upon multiple independent point tools.

-ESG

Slow and inadequate response increases the impact of the attack.



With no clear indicators, it's hard to respond effectively. Organizations have limited time or skills to manage these threats.

68% of breaches took several months or longer to discover. The mean time to identify (MTTI) increased to 197 days and mean time to contain (MTTC) increased to 69 days.

-Verizon

THE SOLUTION

Too many alerts? Not sure what's critical? Hard to investigate? Threats taking too long to detect?

Trend Micro Worry-Free XDR can help - see what you've been missing.

THE ABCs OF XDR

Addressing busy IT needs

Designed for organizations with limited resource, skillset, or time for threat investigation. Automated investigation and step-by-step recommended actions allows you to mitigate issues quickly.

Beyond the endpoint

Worry-Free XDR connects events across email and endpoint. Endpoint activity that seems benign on its own suddenly becomes a high priority alert so you can contain its impact fast.

94% of malware infections come from email, which is the #1 cyberattack source.

-Verizon

Complete visibility

Single console with native integration to endpoint and email security allows you to respond faster with less resource.
